

Affordable Luxury
Naturally looking artificial grass

Beautiful artificial grass For hundreds of applications

Whether you want a beautiful garden, a nice looking balcony or a stylish rooftop area, artificial grass is the answer. With our low-maintenance, durable solutions, it is our mission to make an evergreen outdoor or indoor area achievable and affordable for everyone. Regardless of the size of your property, our products will make a beautiful space so much more attainable.

The benefits of our grass include:

- No watering
- No mowing
- No allergy-causing grass pollen and cuttings
- No fertilizer required
- Lush and green 365 days a year
- Looks and feels like the real thing
- Free of harmful materials
- Constructed with drainage to dry out quickly
- Child & pet-friendly
- Non-toxic
- UV stabilized to minimize fading
- Eight-year warranty against discolorization

You will be surprised by the natural look and endless application opportunities of Signature Turf.

GOLF SOLUTIONS

Synthetic lawn for commercial landscapes

Synthetic lawn is becoming increasingly popular in city environments. In urban areas in which natural landscapes are preferred, but maintenance and water supply are restricted, artificial grass starts to shine. The low-maintenance requirements make it an excellent option for areas that are hard to maintain or highly trafficked.

Not requiring any water or sunlight makes artificial turf an attractive design element for landscape and interior architects. Malls, atriums and office spaces are just a few of the many indoor applications for which artificial grass can be perfectly used.

Another notable area of commercial application are housing developments for which low-maintenance gardens and ease of installation are essential. Transforming balconies, patios, and terraces into a small green oasis makes your property stand out.

Safe for children, pets, and the environment, Signature Turf leaves no room for concerns. The innovative M-shape technology makes sure that your artificial lawn's natural look will have your guests, neighbors, or clients in awe.

Sustainability & Safety

Artificial grass is a sustainable solution. You save on thousands of liters of water and no fertilization is needed.

All our products are designed with safety in mind. We are parents ourselves and made sure that our products pose no harm to the health of your children or pets. Even better, if you plan to build a playground for children, consider installing shock pads below your layer of artificial grass to increase the safe fall height

Artificial grass perfectly tailored to your needs

Signature 20

It is incredibly soft and resistant, and kids and pets love running and playing on it. High traffic areas benefit from the short and resistant fibers, and your lawn will stay beautiful for a long time.

Signature 25

Signature 25 features slightly longer fibers than its shorter sibling Signature 20. The longer fibers give the grass a bit of a wilder look, making it look more natural and softer to walk on. This grass is perfect for big gardens and outdoor areas with a medium amount of traffic.

Signature 30

Beautiful like a freshly cut lawn, Signature 30 makes your outdoor space look like a lively area that invites adults, pets, and kids to walk around or play and enjoy the soft feel and natural look of this medium-sized synthetic grass.

Signature 35

This premium product has the longest fibers and therefore, the 'wildest' look in our portfolio. It is incredibly soft to touch and works excellent in areas designed for relaxation, visual appeal and a natural atmosphere.

Innovative Technology

Artificial grass has come a long way in the last decade. Through the development of innovative production technologies, we are now able to realize enhancements in product design that was unthinkable of only a few years ago.

Guarantees & Certifications

We believe in our products. Extensive testing has shown that we can trust our artificial lawns in every situation we have put them in. We have chosen our production partners carefully to ensure that the highest production standards are met consistently, always.

Not a single product leaves our factories without extensive quality checks.

All of our products come with a eight-year-warranty against decolorization.

Putt 15 PRO

Designed for more demanding golf enthusiasts who wish to practice their putting skills at their own convenience, being it at home or the golf club. If you have a strong passion for golf and have been looking for a realistic alternative to a real course then look no further. This product will enable you to achieve a true to life putting experience offering complete ball control and consistent speed. Putt 15 PRO is our best choice to enhance your golf game.

Putt 13 Leisure

Ideal for the more casual player or leisure golf user. Putt 13 provides a perfect putting surface for players of any ability. Shorter and less dense, this product is the alternative in our golf putting range and our most cost-efficient, user-friendly choice while still offering excellent ball control with slightly slower speeds. Putt 13 is a great choice at home for everybody to enjoy.

Play 30 NF

A product specially designed for multipurpose sports fields and playgrounds that doesn't require any additional infill products. Our product is made from highly durable fibers with a dense supporting root zone which focuses on playability and longevity, resulting in low maintenance and longer usability. This product is widely used for football and multipurpose sports fields in international schools, sports clubs, and high-intensity use playgrounds.

Lifestyle solutions

Enjoying a lush, green garden every day of the year is possible with artificial grass. Its low-maintenance and high durability make it the perfect choice for people with a busy lifestyle but a passion for a beautiful home. You will be surprised how affordable installing an artificial lawn is.

Signature Turf uses the latest generation M-shaped fibers which prevent flattening and allow the grass to be more resistant than regular synthetic turfs. The grass retains its lovely green color and shape year after year and we provide an eight-year-warranty on color fastness.

Where can you install it?

- Residential gardens
- Balconies, terraces & patios
- Playgrounds & schools
- Rooftops
- Urban spaces
- Indoors

LANDSCAPING

Sports solutions

Over the years, we have developed innovative surfacing systems for multi-purpose sports and playfields. The result is a select number of artificial grass systems that are designed to be less hot, more environmentally friendly and safe for the users. All perfectly tailored to balance performance, durability, safety and budget.

Our artificial grass surfacing solutions are used at international schools, sports facilities and playgrounds. From upgrades of the existing sports facilities to completely newly built, we offer tailored solutions.

- 100% safe for users of all ages
- Accommodates a variety of sports and games
- Durable and safe
- Minimum maintenance
- Integrated cooling materials to reduce surface heat

Perfect multi-sports solution

Artificial grass sports fields have proven to be a very cost-efficient and a convenient solution for schools that offer a wide variety of sports as part of their physical education. It is incredibly resistant to wear and tear factors and can withstand the heavy-duty work of football or rugby matches. At the same time, it is soft enough to practice athletics and other slower paced sports.

SPORT FIELDS

Playground solutions

Unsurprisingly, artificial grass use in playground installations has become a widespread trend. Signature Turf can transform a muddy or miserably looking play area into an attractive, inviting place for fun, exercise and play within hours. The unique features of our products make them suitable for new learning facilities, schools, public areas and private properties.

Using Signature Turf for playgrounds provides you with immense benefits:

- Safe for children
- Long-lasting
- Minimum maintenance
- Natural look and feel. No holes, no mud.
- Environmentally friendly
- Dries quickly even after heavy rain
- Kids love it!

Making playgrounds safer by combining artificial grass with shockpads

The combination of artificial grass and shock absorbing foam mats gives you a legit certificate that the fall protection is compliant with the legal requirements norm NEN EN 1177:2008.

PLAYGROUNDS

Golf solutions

We are avid golfers here at Signature Turf and have enjoyed the sport for a long time. Being able to practice all year round in your own backyard has proven to be a valuable investment when it comes to decreasing your handicap. We have designed and produced our golf products with both professionals and amateurs in mind. It is our highest goal to provide you with a realistic training environment that requires no maintenance, so all your time can be spent playing instead of fixing the course.

Our golf solutions offer many benefits

- Realistic golfing environment
- Great attention to details like roll speed
- Low-maintenance requirements
- High cost-efficiency due to a long-life span
- Tailored to your personal needs and wishes

Great choice for golfers of all levels

Having a backyard golf pitch that fits your style and skill levels is an investment that will pay off for every serious golfer. Not having to make the long drive to the club for a short 30-60 minutes' practice allows you to spend more time working on your technique. You will see immediate improvements in your handicap and your friends will wonder if you practice secretly at home.
